### Progress in the Study of *Dryopteris* Hybrids

EDGAR T. WHERRY

In the course of searching for *Dryopteris* hybrids to send to Dr. Stanley Walker for the cytotaxonomic studies recently reported in this JOURNAL,<sup>1</sup> I felt a need for a diagram bringing out their inter-relationships. Now that data as to chromosome numbers can be added, it has seemed worth while to publish such a diagram. Before it can be presented, however, some considera-
